

Pneumatic Walker Boot | Technical Spec Sheet

Product Overview

Description: Junior and Adult Pneumatic Walker Boot
Type: Adjustable
Colours: Black with Grey Sole
Materials: High-impact plastic shell with soft, breathable foam and fabric lining, secured by durable nylon webbing and hook-and-loop (velcro) straps.

Description

Designed to provide superior stabilisation, comfort, and protection for individuals recovering from left or right foot or ankle injuries. Featuring an advanced pneumatic (air) system, this boot offers customisable compression to aid healing, reduce swelling, and enhance patient comfort.

Indications

- Conservative management and post-surgical rehabilitation of Achilles tendon rupture
- Stable fractures of the foot, ankle or lower leg
- Severe ankle sprains or ligament injuries
- Post-operative support for foot, ankle or calf procedures
- Use during trauma recovery and rehabilitation phases

Features

- Anti-slip sole provides enhanced safety and stability.
- Lightweight construction enhances patient comfort and ease of movement.
- Integrated pneumatic air system inflates via a built-in pump for personalised compression and secure fit.
- Air release valve positioned below the pump on either side for easy pressure adjustment.
- Soft, breathable inner lining ensures comfort during extended wear.
- Removable front plastic guard for added protection; includes detachable foam toe padding and two optional square inserts for customised cushioning.
- High-cut design offers full circumferential support and immobilisation.
- Shock-absorbing sole minimises heel impact and enhances walking comfort.
- Ambidextrous design—fits left or right foot.
